

Unlock Scalable AI and Analytics With Teradata VantageCloud on Microsoft Azure

Accelerate enterprise insights with open data access

Enterprises face mounting pressure to deliver real-time insights, yet performance bottlenecks, fragmented data, and stalled AI models slow progress. Teradata's rapidly deployable VantageCloud on Azure helps organizations overcome these barriers.

Scale analytics and AI with a unified, open platform

VantageCloud on Azure integrates with 60+ Azure workloads, enabling seamless access to any data source without costly data movement. Together, Teradata and Microsoft deliver enterprise-grade performance and compliance.

Drive innovation with trusted, scalable analytics

With VantageCloud on Azure, fast, scalable analytics enable businesses to focus on data-driven insights:

- Eliminate data silos: Connect to any data source in the cloud or on premises
- Accelerate AI outcomes: Operationalize models with MSSP and in-database scoring
- Strengthen compliance: Maintain governance across hybrid environments
- Reduce query costs: Lower price per query compared to competitors

<3 days

Time it takes to reconcile data for month-end and quarterly closing of books

Build and deploy models using any language or platform

Teradata VantageCloud Enterprise supports Python, R, SQL, and custom AI platforms, giving data teams the freedom to innovate. With 100+ database functions, native integrations with Azure ML, Synapse, Fabric, and faster AI model scaling using ClearScape Analytics®, customers can scale analytics securely, quickly, and efficiently.

Financial data integration delivers trusted data for Alior Bank

VantageCloud delivers integrated financial insights to accelerate time to close, improve financial accuracy, and achieve rating improvements.

Coupling operations with powerful finance transformation foundation at DHL

DHL Express implemented a finance transformation project to provide business insights through a single global application on Teradata, replacing its costing system.

Self service gets data to business users faster at Banner Health

Banner Health analyzed patient outcomes to improve patient experience with VantageCloud in its nonprofit U.S. health system.

300%

Net promoter score improvement by operationalizing insights via decentralized access to data
